Sym JET X 125cc 2024

The New Flag Ship of the SYM Scooter Range JET X 125

£2,999 +OTR

from **£132.03** p/m

The Jet X, a flagship model in the SYM scooter line up, boasts impressive features that cater to the needs of riders seeking convenience, safety, and luxury riding experience. With a racing bike characteristic design that sets it apart, the Jet X also has high-end specs that offer outstanding handling, perfect manoeuvrability, and ergonomics. Equipped with full LED lighting, including a headlight, position light, taillight, and turn indicators, the Jet X ensures maximum riding safety. The scooter's manoeuvrability and ergonomics are top-notch, providing a relaxing riding position and outstanding handling. The Jet X also comes with Keyless System 2.0, which replaces traditional keys with a special key fob for easy and intuitive ignition access. The LCD instrument is specially designed to display all necessary information clearly and stylishly, with auto-dimming for optimum visibility in all environments. Additionally, the Jet X is fitted with a Hazard Control Light for emergency warning signals. Its 4-valve liquid-cooled engine ensures optimal operating temperatures and improved engine efficiency and performance. The roller rocker arm helps reduce wear and tear, decrease heat generation, and minimize unnecessary power consumption caused by friction. The adjustable rear suspension provides premium support and stability, while the front compartment offers ample storage space for items such as key cards and big screen smartphones. In terms of dimensions, the Jet X measures 2000 x 760 x 1115 mm (length x width x height) and has a wheelbase of 1350 mm. The front suspension is a telescope fork, while the rear suspension is dual shock. The scooter runs on aluminium rims with 100/90-14 front tire dimensions and 110/80-14 rear tire dimensions. The front and rear brakes are disk type with diameters of 260mm and 220mm, respectively, and feature CBS technology. The fuel tank capacity is 7.5 L, and the seat height is 770 mm. The Euro 5 emissions standard-compliant scooter is powered by a 4-stroke engine with a single cylinder and a displacement of 124.6 c.c. It has an EFI fuel system and delivers a maximum horsepower of 9.3 kW at 8000 rpm and a maximum torque of 11.5 Nm at 6500 rpm. The cooling system is liquid-based, and the transmission is CVT. The electric system features an electrical starter, with all lights - headlight, taillight, front position lamp, and front/rear turning signal lights - being LED.
