Keeway Blueshark 80 Lite 2025

An exceptional electric scooter for modern urban commuters

£2,699 +OTR

from £115.98 p/m

Keeway Blueshark is an exceptional electric scooter for modern urban commuters seeking a reliable, innovative, and environmentally friendly mode of transportation. This e-scooter boasts a high-speed gear motor and dual automotive grade Lithium ion batteries that enable high power and huge range, making it one of the best bikes near you.

 The Blueshark is powered by a cutting-edge permanent magnet gear motor that delivers performance that far surpasses that of any typical wheel hub motor. This means that you can expect an adrenaline rush when you start your ride.

 With a market-leading range when using eco mode, the Blueshark is perfect for long commutes or leisure rides around town. The different modes give you the ability to change the balance between power performance and cruising distance by using its two batteries in parallel or series, providing the flexibility to suit your needs.

 Other features of the Blueshark include keyless ignition, reverse, and moving assistance, which make it even more convenient to use. The large information display is beautifully integrated and praised for its advanced look by the press. It's very fitting for an electric scooter, derived from its combination of an iconic exterior design and modern details. You can easily navigate through the menu using the intuitive controls, and the display also shows you important information such as speed, battery level, and range.

 With a top speed of 50mph, the Blueshark is more than capable of keeping up with city traffic and has enough pace to pull away from the traffic lights ahead of the crowd. Additionally, the fast charging feature ensures that you spend low time charging and more time enjoying your ride. If you're looking for a high-performance electric scooter, the Keeway Blueshark is definitely worth considering. Book a demo test ride today to experience its power and range for yourself.
