Keeway RKV125C 2025

V-Twin Bobber with Attitude

£3,499 +OTR

from £152.37 p/m

Keeway RK V125C is a modern take on the classic V-twin cruiser, combining timeless design with up-to-date components for the contemporary rider. Featuring a new 125cc V-twin engine with 6 valves, liquid cooling, and electronic fuel injection, the RK V125C delivers peak figures of 10.2kW of power and 14.4N.m of torque, more than enough to push the 164kg (dry) motorcycle.

 Unlike other motorcycles of its size, the RK V125C comes equipped with inverted front forks and front and rear disc brakes, ensuring optimal performance and handling. Thick 120/80-17 and 140/70-17 tires adorn the front and back, respectively, adding to the low and wide cruiser look. The 2-into-1 exhaust provides a clean view of the polished engine case while emitting the distinctive rumble of a V-twin. The chain final drive ensures optimal comfort and minimal maintenance.

 The electronics of the RK V125C are also thoroughly modernized, featuring a thin, round headlight that projects the Keeway logo on the DRL, producing a 3D effect when combined with the LED low- and high-beam lamps. The instrument cluster is circular and features a white-on-black digital display highlighted by a radial tachometer around the speedometer. The tank of the RK V125 C is wide in proportions and comes in solid red or black finishes. Holding a massive 19 liters of fuel, it gives the RK V125 C class-leading range with just one fill-up, perfect for those never-ending road trips. The low 690mm seat height ensures comfort for riders of all sizes.

 Overall, the Keeway RK V125 C is a stylish and reliable motorcycle that is perfect for those looking for a modern take on the classic cruiser. With its sleek design, up-to-date components, and class-leading range, the RK V125 C is the perfect bike for those looking to hit the open road.

 Keeway RK V125C is available in Black or Red.
