Lambretta X300 SR 2025

Colours of time

£4,899 +OTR

from £218.32 p/m

COMING SOON The X series represents a completely new product line, with an innovative design still representing the typical Lambretta DNA. X 300 is the first model of this new series. And it anticipates the new ambitious horizons of success. The shapes were born from a concept conceived by Walter Scheffrahn, President of Lambretta. The X300 is developed as the 'ideal vehicle' of the new generation of Lambretta enthusiasts, anticipating their high expectations in terms of quality and design. The X features sporty and tapered lines, which immediately recall the typical stylistic features of the legendary Lambretta's of the past. The stroke of the design of the steel shells is innovative, with "diamond" lines that still preserve the Lambretta soul and spirit, updating them in a new guise. The fixed fender is maintained, which is a peculiar characteristic of Lambretta. From a technical point of view, the X chassis is a semi-monocoque that combines the shield, footboard and side panels made of steel. Among the various product features; double linkage front suspension and shock absorber; double disc brake; dual-channel ABS; Full LED headlights; the keyless system for starting. For electronic injection, the technical partner is Bosch. X 300 encompasses the Italian spirit but is the result of a collaboration with international technical partners.
