Sym ADX 125cc LC 2025

Inspired the Spirit of Adventure

£3,699 +OTR

from **£161.46** p/m

Inspired by a sense of adventure, the SYM ADX 125 scooter boasts a unique and distinctive personality that sets it apart from other vehicles. Its design is a perfect blend of power, speed, and style elements, while also combining versatility with sophisticated beauty.

 With features like a mono-shock absorber, special tires, and a comfortable riding position, the ADX can effortlessly handle rough and smooth terrains with equal ease. The ADX is not just a commuter scooter; it is a true masterpiece of crossover engineering that transforms every ride into an enjoyable and exciting adventure. Whether you're seeking a thrilling ride or just some simple fun in your daily life, the ADX is the perfect partner that you've been dreaming of.

 To enhance both style and safety, the ADX is equipped with full LED lighting, including LED headlights, position lights, tail lights, and turn indicators. The LED lighting not only makes the ADX visually stunning but also greatly improves its safety on the road.

 The all-new 5" TFT instrument features an auto-dimmer that ensures great visibility in all lighting conditions. Additionally, it has two modes - Day and Night - that can be switched automatically. The clear instrument information provides optimal support for riders on all their adventures.

 The keyless system 2.0 is more user-friendly and easier to operate. It also features an emergency ignition mode that allows you to start the engine even when the key fob battery is low.

 The ADX boasts a large 15L fuel tank, which reduces the frequency of visits to the gas station. This fuel tank capacity is even larger than most maxi scooters, allowing riders to focus on enjoying their ride without worrying about fuel.

 The ADX also features a front compartment that provides convenient storage space for your phone, wallet, or other gadgets, making it the perfect companion for both short and long trips.

 Additionally, the ADX scooter features a front compartment that allows riders to put their phones, wallets, or gadgets inside. The scooter's dimensions are 1980 x 780 x 1225 mm in length, width, and height, respectively, with a wheelbase of 1390mm. It has a telescope fork front suspension and a single-sided mono-shock rear suspension, both made of aluminium rims. The front tire dimensions are 120/70-13, while the rear tire dimensions are 130/70-13. The front and rear brakes have disc diameters of 260mm and 230mm, respectively, and both are equipped with ABS.
