Sym ORBIT III 125cc 2025

Affordable and Stylish ORBIT 125cc Scooter

£2,199 +OTR

from £93.24 p/m

SYM Orbit 125cc scooter is a sleek and stylish commuter scooter that boasts a sporty yet elegant appearance. Designed with simplicity and clarity in mind, this entry-level scooter offers an elevated level of quality that enhances the overall riding experience.

 One of the key features of the Orbit III is its innovative A.L.E.H. system, which stands for Anti-Lift Engine Hanger. This system effectively addresses the phenomenon of gravity shift that occurs when the vehicle accelerates. By utilizing a special engine suspension system, the Orbit III maintains a stable even position between the engine and the main body when accelerating, which reduces the effects of weight transfer and instability giving a smoother and more comfortable ride.

 The Orbit III's dimensions are 1900 x 682 x 1120 mm (L x W x H), with a wheelbase of 1320 mm and a curb weight of 115 kg. The front suspension is a telescopic fork, while the rear suspension is a mono shock. The front and rear rims are made of aluminium, with tyre sizes of 110/70-12 and 120/70-12, respectively. The front brake has a single 226mm disc brake while the rear brake has a 130mm drum. Both front and rear brakes feature CBS for greater safety and reduced stopping distances (Combined Braking System).

 The Orbit III is powered by a Euro 5 compliant 4-stroke engine with a single cylinder and a displacement of 125 cc. The fuel system is E.F.I. (Electronic Fuel Injection), and the engine is air-cooled. The maximum horsepower is 8.4 kW at 8500 rpm, while the maximum torque is 10.3 Nm at 6500 rpm. The scooter can reach a maximum speed of 99 Km/h (62 Mph) and features a C.V.T. (Continuously Variable Transmission). The electric system uses an electrical starter to power up the engine.

 Overall, the Orbit III is a reliable and efficient commuter scooter that offers a comfortable and stable ride for the rider. With its advanced A.L.E.H. system and innovative design, this entry-level scooter is a great choice for anyone looking for a quality vehicle for daily commutes or leisurely rides in or out of town.
